

## INDIVIDUALIZED SCHOOL EXPERIENCE CONTRACT

Applicants for the master's in school counseling should have some experience, either volunteer or employment in a school setting. Applicants who have little or no school experience are asked to commit to gain a specified number of hours of time in a school setting. If you are tentatively admitted into the program and need school experience, you will meet with a program mentor to develop an action plan. You will have the first semester of graduate study to complete this requirement.

Please note that your school experience contract is subject to revision during your first semester based upon your needs and interests as jointly determined by you and your advisor.
