Assignment 2:

1. Describe in detail and on a single page or less, the mechanism of a search engine. You can check out www.searchenginewatch.com or other websites.

2. Compare the advanced features of three search engines (choose Google OR Yahoo and 2 other search engines).
   a. Prepare a table listing 5 advanced features of each search engine.
   b. Perform a search for an IT phrase e.g. TCP IP, electronic wallet, etc on each of the search engines.
   c. Compare the results e.g. number of hits, relevance, recent, number of hits, etc
   d. In your own opinion, which search engine provided the best result? Why?
